

Carhenge

Created By Jim Reinders

Nebraska's Answer to Stonehenge

*A visit to Carhenge is a uniquely
American experience.*

Located 2½ Miles North of
Alliance, Nebraska
On Highway 87

Carhenge is a replica of Stonehenge, England's ancient alignment of stones that chart the phases of the sun and the moon. Created from Vintage automobiles, the dimensions of Carhenge replicate Stonehenge. The cars are primarily from the 1950's and 1960's. They are planted trunk down and rise 15 to 17 feet. The cars are approximately 7 feet wide; the same size as the standing stones of Stonehenge.

All 38 of the major stones at Stonehenge are cleverly represented at Carhenge.

Carhenge appeals to persons of all ages who are interested in history, astronomy, unusual art forms, cars and adventure!

Carhenge is situated on a 10-acre site owned by Friends of Carhenge.

Also on the site is the Car Art Reserve, which features a number of sculpture pieces made entirely of cars and / or car parts.
